Advanced Encapsulation Technologies for Topical Applications

### NATURAL HYDROSAL®

Salvona is pleased to announce the commercialization of a new proprietary, time-release technology platform for topical applications, made with all-natural ingredients. These solutions are appropriate to all lines of products, including natural and credo. The encapsulation of active and functional ingredients in Natural HydroSal® provides skin benefits with immediate and lasting effects. It's good for the consumer and for the environment.

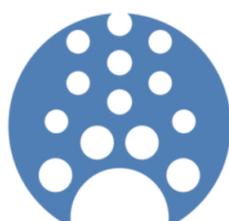

#### NEW PRODUCT:

### NATURAL HYDROSAL® MOISTURIZER, PID#8044-02

The delivery of natural ceramides makes the skin healthier, younger-looking, smooth, firm, and beautiful. Our delivery system contains natural ceramides that are similar to our skin. This technology enables easy penetration to replenish the skin with essential ingredients to strengthen the skin barrier properties. Formulation chemists will love this technology because it's so easy to use. Consumers can feel moisturized skin immediately. This technology-based raw material is ideal a formulation for consumers with sensitive, mature, and extra dry skin. Use Salvona's Natural HydroSal for your natural lines when searching for immediate and lasting improvement.

### ONLINE SERVICE

Salvona offers 24/7 service online ([www.salvona.com](http://www.salvona.com)), with complete technical and regulatory data and the ability to order samples and place orders.

**SALVONA**  
Unique & Easy

### UNIQUE AND EASY

Salvona's technology is focused on producing unique, technology-based solutions for topical applications including skin, scalp, and hair. In addition, the technologies are easy to use and compatible with most water-based formulas, which is ideal for extending lines with rinse-off and leave-on products aimed to enhance skin appearance. The products are exclusive, effective, and will elevate your marketing message.

### MAIN BENEFITS OF NATURAL HYDROSAL® MOISTURIZER (NHS MOI)

NHS MOI is a raw material that contains the critical elements to moisturize the skin fast and longer. A minor dose into your formula is easily incorporated. It allows for smooth processing and eliminates the need to preheat and melt the ceramides. This time-release delivery system of potent skin moisturizing ingredients provides skin barrier renewal and repair benefits.

In addition, moisturizing, it was anti-inflammatory properties work to reduce signs of skin damage and skin aging.

#### Additional claims and unique features:

- Sub-micron spheres of ceramides offer immediate and longer-lasting benefits.
- The application of ceramides significantly decreases acne lesions, dryness, and irritation associated with lesions
- Inhibits visible signs of aging
- Effective therapy for the treatment of psoriasis and atopic dermatitis
- Alleviates dry skin caused by harsh soaps and environmentally hazardous conditions
- Facilitate the restoration of the skin barrier
